for ESD Protection in Flat Screen TVs and Monitors

The increasing demand for thin designs as well as for high-definition digital content are making flat screen TVs and monitors more complex and thus more vulnerable to electrostatic discharge (ESD).

These high quality electronic products however must offer high ESD robustness.

The system user interfaces, and the input/output (I/O) ports in particular, are the most critical areas. Because these interfaces are entry points for surge current into the system, it is essential to protect the systems from undesirable damage by using ESD protection devices.

EPCOS offers a broad CeraDiode® portfolio for bidirectional ESD protection (acc. to IEC61000-4-2, level 4 standard).

## Applications

- Audio port
- VGA
- S-Video
- Serial port
- SCART
- Ethernet
- IEEE 1394
- USB 2.0
- USB 3.0
- HDMI 1.3
- HDMI 1.4
- DVI

# CeraDiodes for ESD Protection in Flat Screen TVs and Monitors

## Features and benefits

- Ultra-low capacitance values for high signal data rates
- High transmission bandwidth for high quality audio signals (0 dB up to 1 MHz)
- Bidirectional operation
- Low clamping voltage
- Fast response time: < 0.5 ns

## Characteristics

- Types: single and array devices
- DC voltage: 5.6 up to 30 V
- Typical capacitance: 0.6 up to 470 pF
- ESD robustness to IEC 61000-4-2, level 4
- Operating temperature range: -40 °C ... 85 °C
- Lead-free soldering: nickel barrier termination
- RoHS-compatible

## Type designation system

Example:

CD	S	2	C	05	GTA
